

# CN-U

# THE ONLY TOPICAL PRODUCT THAT PENETRATES THE NAIL

The unique patented carrier system allows for penetration of both the nail bed and nail plate.

The topical application renders CN-U absolutely safe with no toxicity.

CN-U is the most powerful restoring agent for discolored nails ever invented.

*FDA registered formula  
sold only by  
medical practitioners.*

*"CN-U is the only formula that has been shown to consistently restore nails to a healthy appearance."*

- STEVEN MCLAIN, MD

INTERNATIONALLY RECOGNIZED DERMATOPATHOLOGIST, NEW YORK, NEW YORK

*"The invention of CN-U represents a breakthrough in the effort to create healthy appearing nails after decades of failure by other entities."*

-JOHN V. ADAMS, DPM

NATIONALLY RENOWNED PODIATRIST, BEVERLY HILLS, CA

## CN-U™

FUNGAL NAIL RENEWAL GEL

PHMB 0.5% (Polyhexamethylene Biguanide)  
40% Urea

**Sold only by medical practitioners.**

## What to Expect

### Typically, the following will take place:

1. With the first several weeks of use the toenail will show a clear border between the discolored and non-discolored portion.
2. The infected discolored portion of the nail will become soft and crumbly. The infected nail will become thinner.
3. At about the same time or soon thereafter the toenail may start to show dark streaks. These streaks are evidence that **CN-U** is working.
4. Over the next several months the nail will appear clearer and clearer. The length of time this process takes is a function of how fast the nail grows.
5. **CN-U** can be used on fingernails.

**Before**

**After**

Topical 10 mL

**CN-U**<sup>™</sup>

FUNGAL NAIL RENEWAL GEL
